ECHO AFC Transportation Team

ECHO AFC Electrostatic Disinfectant Cleaning During COVID-19 & Beyond

Echo AFC Transportation are committed to your safety, we have increased detailing and disinfecting our vehicles prior and in between our dispatches. We have been increasing policies and best practices to protect our ridership and employee's health and adjusting practices every day to improve.

We are pleased to announce the **ECHO AFC PURE PROTECT**, the Enhanced Passenger Compartment Sanitization and Disinfection. ECHO AFC has purchased many electrostatic sprayers (image to the side) which is being used daily into cleaning / disinfecting procedures on all vehicles in all cities and States that we reside in, including over the road vehicles. In July 2020 and beyond, all vehicles are electrostatic sprayed on every one of our departures, in addition to disinfecting customer touch points and surfaces before every morning trip.

As your trusted partner in transportation, we are committed to making responsible decisions about how to protect the passenger compartments using tools such as the above picture devise along with social distancing on board (upon client requirement) and the use of face mask during this outbreak of COVID-19. **We are here to help, and we'll continue to invest in safeguarding our passengers and employee's health even after the pandemic subsides.** It is important for you to know what we are doing everything possible at ECHO AFC for your piece of mind. We will be disinfecting the vehicles – not only for COVID-19, but for all viruses and possible pandemics in the future. Between salmonella, E. coli, MRSA, norovirus, influenza, and human coronavirus, it is clear why wiping down surfaces isn't enough anymore.

In today's environment everyone is still looking for a stronger defense against the transmission of any virus such as COVID-19 or other mutated versions. We call it

the **ECHO AFC Electrostatic Cleaning**. This type of system is currently being used by airlines, transportation entities and other industry businesses.

Our clients will appreciate this advanced Electrostatic Cleaning process because it provides uniform coverage in all types of environments – plus, it is safe for sensitive surfaces (including equipment and electronics). The sprayer emits positively charged particles that “wrap around” surfaces in your facility (which are negatively charged). Ultimately, it reached the impossible corners, crevices, backsides, and other hard-to-reach places often missed during a general cleaning.

Modified Vehicle Seating for Social Distancing

****Due to the current pandemic the following requirements must be adhered to:**

- ALL passengers are required to wear a mask while on the vehicle; at all times.
- The first row of seats (behind the driver) on either isle will be inaccessible for seating.
- Restroom use – will require ECHO AFC management approval.
- Food and/or drink – will require ECHO AFC management approval.
- In order to avoid isle congestion Passengers must fill seats back to front when loading and front to back when unloading vehicle.
- “Every other seating” is recommended but not enforced; this will be based on groups discretion and their level of comfort.

56 Passenger Motor Coach – Modified Seating (52 Passengers)

40 Passenger Mini Coach – Modified Seating (36 Passengers)
